

Official

IN THE CLAIMS:

Please amend claims 1, 3, 8, 15 and 18 as follows:

1. (Thrice Amended) An information processing system comprising:

a first information processing device having a first wireless communicator for receiving and sending data information from and to a base station by wireless communication and a display for displaying the data information; and

a second information processing device having a second wireless communicator for receiving and sending data information from and to the first information processing device by wireless communication and a display for displaying data information corresponding to the data information displayed by the display of the first information processing device.

3. (Thrice Amended) An information processing system according to claim 1; wherein the data information displayed by the display of the second information processing device corresponds to information relating to an ongoing communication state between the first information processing device and the base station.

8. (Thrice Amended) An information processing method, comprising the steps of:

providing a first information processing device having a first wireless communicator for receiving and sending data information from and to a base station by wireless communication and a first display for displaying the data information;

providing a second information processing device having a second wireless communicator and a second display; and

operating the second information processing device so that the second wireless communicator receives and sends data information from and to the first information processing device by wireless communication and the second display displays data information corresponding to the data information displayed by the first display.

15. (Twice Amended) An information processing system comprising:

a first information processing device having a first wireless communicator for receiving and sending data information from and to a base station by wireless communication and a display for displaying the data information;

a second information processing device having a second wireless communicator for receiving and sending data information from and to the first information processing device by wireless communication and a display for displaying information; and

display control means for controlling the display of the second information processing device to display data information corresponding to the data information displayed by the display of the first information processing device.

18. (Twice Amended) An information processing system according to claim 15; wherein the data information displayed by the display of the second information processing device corresponds to information relating to an ongoing communication state between the first information processing device and the base station.
